Aim

Activity 3.6 – Measuring of Green Corridor Performance

This activity aims at finding and using **key performance indicators** (KPI) to measure Green corridor performance. It will be used for improvements and long-term systematic elimination of bottlenecks. **Analyze tools** will be tested to prioritize investments according to KPI-effects.

Activity 3.6 – Milestones

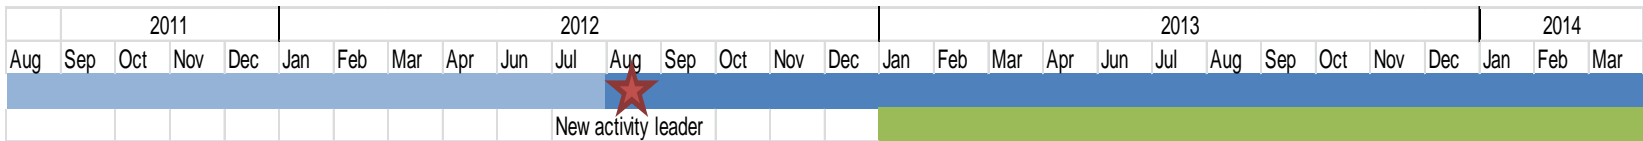

Long term
systematic bottle
necks elimination
communicated
through a mutual
Nordic
infrastructure
status dash board.

Development of a
link and effect
model

Activity 6.1 – Activities

Literature review of KPI
 Measure selected KPI.
 Workshop about outcome from measurement.
 Make results available on-line to partners (effects of investments on KPI).
 Suggestions for future work.

Use and compare at least two analyze tools to describe effects on chosen KPI of two suggested investments.

Thank you for
your
attention!
