

# BGLC – Activity 6.1 Corridor structure enabler management

Bodö 28-29 of May 2013

Maria Öberg, Luleå University of Technology.

News – draft international study

VTT research centre, Finland, and University of Thessaly,  
Greece

The report includes

- case studies of the fifteen pre-defined questions.
- documentation from the workshop 23<sup>rd</sup> of April in Örebro.
- conclusions of the international study.

Confirms the first literature study (LTU) – no single solution,  
stakeholder participation, clear leadership, communication,  
agreements.

Interesting distinction between geographical and business  
based corridor development, and their specific features.

**Report in basecamp – for you to comment until 31<sup>st</sup> of May.**
